

AUTOYOUTM
ESSENTIAL VEHICLE PROTECTION

Scan to view the DIY application video

**CONGRATULATIONS! YOU ARE ONLY A FEW STEPS AWAY FROM PROTECTING
THE INTERIOR AND EXTERIOR OF YOUR NEW CAR**

We highly recommend you view the DIY application video online, simply visit www.autoyou.com.au/diy-how or select the **Applied tab on the AutoYou website and enter the password **DIYprotect** to view the full instructional presentation and register your warranty.**

Please take your time and read over the following instructions carefully

WHAT YOU NEED!

1. Two clean buckets
2. The AutoYou DIY package
3. Access to water/electricity and a hose.

The application process will take you between four to six hours depending on the condition and size of your vehicle.

IMPORTANT THINGS TO REMEMBER

- Never apply AutoYou ceramic protection onto a warm surface. Always apply away from direct sunlight and out of the wind. Do not apply protection products above 25 degrees.
- Never apply AutoYou ceramic protection to glass windows
- Keep contents of the DIY protection system away from children at all times
- Apply the interior and exterior protection in a stable environment away from dust and air born contaminants

STEP

01

HOW TO WASH YOUR CAR USING THE ENVIRO-CLEANER

Hose down your car with water to remove excess dirt/debris. Fill two buckets of water half-way. Take cap off the enviro-cleaner bottle and pour contents into a bucket with a microfiber wash glove in it. Use the second bucket of water to rinse your sponge after it has washed each section of the car. Wash your car with straight strokes to avoid swirl marks. Wash your car from the horizontal top sections first and then the sides and lastly the wheels. Always hose your car frequently to prevent the soap from drying on the vehicles surface. Chamois dry .

STEP

02

APPLYING AUTOYOU ARMOUR CERAMIC

Please note the glass bottle you receive holds up to 60ml of liquid. 25ml of AutoYou Armour Ceramic is enough to treat a normal car. The glass bottle of ceramic you receive contains 40ml so the bottle is not entirely full. 40ml of AutoYou ceramic will easily treat a large SUV

Look over your car's paintwork and ensure there are no scratches/tar/stains or discolouration. Once you're happy with the vehicle's paintwork you can begin applying the ceramic.

Dampen a microfiber cloth and application pad. Open the bottle of ceramic and pour between ten and fifteen drops onto the damp pad. Apply the ceramic onto the painted surfaces with even circular strokes. We recommend beginning with the bonnet/roof and boot first. Only cover between one to two panels at a time, and then remove excess firstly using a damp microfiber cloth. Secondly use a clean cloth to remove all excess and polish the surface to a brilliant shine. Ensure all excess ceramic is removed prior to coating the next panels.

REMEMBER TO NEVER APPLY CERAMIC ON WARM PAINT.

Continue the process until the painted surfaces of the car are protected.

If you leave excess ceramic on a panel, use the Paint Cleanser to remove it. (see instructions on the bottle)

FABRIC PROTECTION APPLICATION

Make sure all interior fabric surfaces are clean and free of dirt and debris. Insert the trigger spray into the fabric protection bottle and adjust the nozzle so a fine mist emits when you compress the trigger. Spray the fabric and carpet surfaces evenly and rub in the excess with your hand to ensure even coverage. Clean excess off leather or plastic surfaces with a damp microfiber cloth. Be sure to use the entire contents of the bottle to make sure the surfaces are treated suitably. Depending on the weather the product should dry within a few hours.

LEATHER & VINYL APPLICATION

Ensure all leather/vinyl surfaces are clean prior to application.

Dampen an application pad and apply a reasonable amount of leather/vinyl solution to the surface. Apply directly onto all leather/plastic and vinyl surfaces. Use a soft brush to apply the product into air vents and small hard to reach places. Once you have applied the leather/vinyl product to all the relevant surfaces let it cure for two hours and then wipe over the surfaces with a clean microfiber cloth to remove any excess.

We highly recommend you take your time with the application of the interior and exterior products. You will get the best results when you pay attention to detail and do not rush.

If you require further assistance, please visit www.autoyou.com.au/diy-howand view the application video

Good luck!

COMPLEMENTRY MAINTENANCE PRODUCT INSTRUCTIONS

CAR SHAMPOO

DO NOT WASH YOUR CAR ON A HOT DAY

Hose down your car with water to remove excess dirt/debris. Fill two buckets of water half-way. Take cap off Car Shampoo bottle and insert pump top. Squirt six or more pumps of shampoo (30-40ml) onto a microfiber wash glove and two more into a bucket of water. Use the second bucket of water to rinse your sponge after it has washed each section of the car. Wash your car with straight strokes to avoid swirl marks. Chamois dry for a better finish.

EXTERIOR SHINE

Product can be used on exterior painted surfaces and all glass inside and outside the vehicle. This product is safe to use on window tint. Wash your car prior to use. Shake bottle well before use. Take cap off bottle and insert trigger spray. Spray directly onto clean painted surface or onto a clean/damp microfiber cloth. Wipe over the surface area using a soft circular motion until clean.

BUG & TAR REMOVER

Clean the affected area with a damp microfiber cloth. Shake bottle well before use. Take cap off bottle and pour a small amount of liquid directly onto a clean/damp microfiber cloth. Wipe over the affected area using a soft circular motion. Once the surface is clean, wipe over with a clean microfiber cloth to ensure all residue is removed.

PAINT CLEANSER

Clean the affected area with a damp microfiber cloth. Shake bottle well before use. Take cap off bottle and pour a small amount of liquid directly onto a clean/damp microfiber cloth. Wipe over the affected area using a soft circular motion. Once the surface is clean, wipe over with a clean microfiber cloth to ensure all residue is removed.

WINDOW SHINE

Wash your car prior to use. Shake bottle well before use. Take cap off bottle and insert trigger spray. Spray directly onto the windows surface or onto a clean/damp microfiber cloth. Wipe over the surface area using a soft circular motion until clean.

INTERIOR CLEAN

Clean the affected area with a clean damp microfiber cloth. Shake bottle well before use. Take cap off bottle and attach pump top. Do not apply product directly onto the stained surface. Dampen a clean microfiber cloth and depress top of pump to apply liquid directly onto the microfiber cloth. Apply Interior Clean using a soft circular motion to an inconspicuous area prior to using on your interior carpet, leather or vinyl surface. Once the surface is clean wipe over with a clean microfiber cloth to ensure all cleaning residue has been removed.
