

AUTOYOU
ESSENTIAL VEHICLE PROTECTION

PRODUCT APPLICATION GUIDE

Paint Protection, Fabric and Leather/Vinyl protection has been applied to your vehicle at the time of delivery

PLEASE USE CAUTION

Always keep away from children and store in a secure cool dry place.

All AutoYou products are water based for your safety and wellbeing. We recommend you use appropriate safety clothing at all times. Gloves, eye protection and a breathing apparatus should be worn when applying AutoYou products.

To view Safety Data Sheets please see the AutoYou website.

The AutoYou Complements Package

- 1. Paint Magic**
- 2. Paint Cleanser**
- 3. Car Shampoo**

Please note the colour of microfiber cloths, application pads and wash mitts may change due to supply availability.

There is no difference in the quality of the product if the colour has varied.

EXTERIOR CLEANING

AUTOYOU CAR SHAMPOO

AutoYou car shampoo has been designed specifically to complement the already applied AutoYou paint protection. Its protective wax formula ensures your car is cleaned properly whilst maintaining a brilliant shine.

How to wash your car

1. Shake bottle well before use.
2. Unscrew the AutoYou Shampoo cap and insert pump top
3. Pump until product is dispensed
4. Dispense six pumps into an empty bucket
5. Select your AutoYou microfiber wash mitt and place it in the bucket.
6. Dispense two pumps of AutoYou Car Shampoo on to the top side of the mitt
7. Fill up the bucket with water. Instant soap suds will form.
8. Hose off any excess dirt from the car. (Please see local water restrictions prior to washing your vehicle)
9. Do not wash your vehicle in direct sunlight.
10. Whilst your paintwork is wet, wash over the top sections (roof, boot and bonnet) first.
11. Secondly wash all your windows and then concentrate on the lower parts of your car (doors, rear bumper and front).
12. Hose off any soap, which is on your vehicle before it dries.
13. Always wash your wheels last to prevent dirt being dragged over paintwork later in the cleaning process.
14. Wash off soap suds from wheels and tyre.
15. Use a clean microfiber cloth or clean chamois and wipe over the vehicle to dry all surfaces.
16. To ensure your car is completely dry take it for a five-minute drive.
17. Wipe any excess water off the car.

AUTOYOU PAINT MAGIC

AutoYou Paint Magic has been designed to add extra protection to the already applied AutoYou Paint Protection. AutoYou Paint Magic has been constructed using an amazing wax resin formula. Designed to clean of bug residue and also provide longer protection when applied to wheels against the build up of annoying brake dust.

Paint Magic is also brilliant for cleaning windows. It leaves a protective clear coat on the glass surface to ensure your windows stay cleaner for much longer. Perfect to help prevent bug splatter sticking to your front windscreen.

How to apply AutoYou Paint Magic

1. Shake bottle well before use.
2. Ensure your car has been washed and dried properly (refer to car washing instructions within this booklet).
3. Unscrew cap from the AutoYou Paint Magic bottle.
4. Insert spray nozzle and turn the nozzle head clockwise to open.
5. Use a small clean microfiber cloth.
6. Adjust the spray nozzle until a fine mist is produced.
7. Do not use in direct sunlight.
8. Ensure the surfaces are dry and not hot prior to spraying.
9. Spray sparingly as the product will apply better with less excess.
10. Either spray the surface for example a window or door and then wipe off with the microfiber cloth. Alternatively spray some solution onto the microfiber cloth and then wipe the surface until the excess disappears.
11. To clean bug splatter off front bumpers and headlights simply spray the solution onto your microfiber cloth and wipe over the effected area.

Applying to Wheels

1. Ensure surface of the wheel is clean prior to use.
2. Spray the wheels first and then use your microfiber cloth. Rub over the center of the wheel and then the outer perimeter to ensure an even clean finish.
3. Once applied AutoYou Paint Magic will leave a microscopic wax coating over the wheels surface to prevent dirt and brake dust sticking. Please note over time dirt and brake dust will form over your wheels but they will be much easier to clean after the application of AutoYou Paint Magic.

Applying to Windows

1. Ensure surface of the windows have been cleaned prior to application.
2. Spray the window or your microfiber cloth and rub over the surface until clean. This will leave a resilient clear coat, which will help repel water, road grime and bugs for longer.

AUTOYOU
ESSENTIAL VEHICLE PROTECTION

AUTOYOU
ESSENTIAL VEHICLE PROTECTION

AUTOYOU PAINT CLEANSER

AutoYou Paint Cleanser not only polishes your paintwork but also leaves a protective coat. Benefiting the already applied AutoYou Paint Protection. Designed to cleanse paintwork and help reduce the effect of very minor surface scratches.

How to apply AutoYou Paint Cleanser

1. Shake bottle well before use.
2. Ensure the effected surface is clean prior to application.
3. Unscrew bottle top and insert pump top.
4. Select a clean AutoYou microfiber application mitt.
5. Depress the pump until it emits the Paint Cleanser.
6. Depress one pump onto the application mitt and fold ensuring the mitt absorbs the product.
7. Rub firmly on the effected area until the desired result is achieved (remember this is only a minor surface cleanser and if the scratch or imperfection is too deep you need to take your car to a preffessional for advice).
8. Wipe the excess off with a clean microfiber cloth.

INTERIOR CLEANING

1. Simply wipe dashboard and leather or vinyl surfaces with a clean damp microfibre cloth.
2. Fabric surfaces such as seats and carpets can be wiped over with a clean damp microfibre cloth.
3. Dampen a clean cloth in warm water and if required use a small amount of baby shampoo for carpets. We recommend only 10ml per litre.
